MUNKHTENGER ENKHBOLD

Arlington, VA | 571-726-1282 | munkhtengery@gmail.com | github.com/munkhtenger0 | munkhtenger0.github.io

SUMMARY

Data analyst with 3 years of professional experience in financial data analysis, audit, and government reporting. Hands-on technical background in SQL, Python, Power BI, Tableau, and AWS cloud environments. Experience spans Big 4 audit, government finance, healthcare data validation, and self-initiated analytics projects.

TECHNICAL SKILLS

Analysis	SQL (joins, CTEs, window functions, subqueries), Python (pandas, numpy, matplotlib), Excel (pivot tables, VLOOKUP/XLOOKUP, financial modeling)
Visualization	Power BI, Tableau, Excel dashboards, KPI and executive reporting
Data & pipelines	Data cleaning, validation, QA, ETL, source-to-target mapping, REST API integration
Cloud & tools	AWS (Redshift, Athena, Glue), Git/GitHub, Jupyter, VS Code
Domain	Financial statements, audit methodology, budget variance analysis, HIPAA, healthcare data

EDUCATION

M.S. in Data Analytics, Business Analytics Concentration — Expected Sept. 2026
University of the Potomac, Washington, DC | Enrolled June 2025

B.S. in Financial Administration — June 2022
University of Finance and Economics, Mongolia

EXPERIENCE

Data Analyst Intern | MDThink, State of Maryland — Jan 2026 to May 2026
Remote

- Validated and reconciled large Medicaid healthcare datasets; developed advanced SQL queries using CTEs, window functions, and joins for reporting extracts and reconciliation logic
- Performed source-to-target data mapping, data profiling, and quality assessments in AWS environments including Redshift, Athena, and Glue
- Ensured HIPAA compliance and audit readiness; prepared analytics-ready curated datasets for KPI dashboards and executive reporting

Financial Data Analyst | Ministry of Finance of Mongolia — 2025

- Tracked budget variances across government departments and flagged discrepancies before reports reached leadership, ensuring data integrity across national reporting cycles
- Built Excel reporting templates and data models that standardized financial information consolidation across units, reducing manual work on recurring deliverables

Assurance Senior Associate | Ernst & Young (EY) Mongolia — 2022 to 2025

- Worked with major institutional clients including the Development Bank of Mongolia, Mongolian Mining Corporation, and insurance sector organizations across banking, infrastructure, and public sector engagements
- Built Power BI and Tableau dashboards tracking KPIs across 3+ concurrent engagements; produced structured reports for leadership translating complex findings into clear, actionable outputs
- Ran QA checks on client datasets before delivery, catching inconsistencies that would have affected reporting accuracy and audit readiness

Finance Intern | Mongolian Mortgage Corporation — 2022

- Tracked loan portfolio metrics and supported management reporting on repayment trends

PROJECTS

Forensic Financial Analytics — github.com/munkhtenger0/forensic-financial-analytics

- Built a Python pipeline pulling live SEC EDGAR financial data to apply the Beneish M-Score model across 21 major public companies, automating earnings manipulation risk scoring

Arlington County Crash Analysis — github.com/munkhtenger0/arlington-crash-analysis

- Analyzed five years of Arlington County traffic crash data to identify high risk corridors and peak crash hours supporting Vision Zero safety planning
