

MUNKHTENGER ENKHBOLD

Arlington, VA | 571-726-1282 | munkhtengery@gmail.com | github.com/munkhtenger0

SUMMARY

Data analyst with 3 years of experience across Ernst & Young and the Ministry of Finance of Mongolia, working with large financial datasets, building reporting systems, and producing dashboards for government and institutional clients. Used to environments where accuracy is non-negotiable and findings need to be communicated clearly to non-technical audiences. Currently finishing an M.S. in Data Analytics at the University of Potomac. Proficient in Excel, SQL, Python, Power BI, and Tableau.

TECHNICAL SKILLS

Analysis	SQL (joins, window functions, aggregation), Python (pandas, numpy), Excel (pivot tables, VLOOKUP/XLOOKUP, financial modeling)
Visualization	Power BI, Tableau, Excel dashboards, KPI tracking, executive reporting
Data & pipelines	Data cleaning, validation, QA, reconciliation, REST API integration
Financial domain	Financial statement analysis, audit methodology, budget variance analysis
Tools	Git/GitHub, Jupyter, VS Code

EDUCATION

M.S. in Data Analytics — Business Analytics Concentration

Expected June 2027

University of the Potomac, Washington, DC

B.S. in Financial Administration

June 2022

University of Finance and Economics, Mongolia

EXPERIENCE

Financial Data Analyst | Ministry of Finance of Mongolia

2025

- Collected, organized, and analyzed financial data from multiple government departments to support national budget monitoring and quarterly reporting cycles.
- Tracked budget variances across departments and flagged discrepancies for senior review, ensuring data integrity before reports reached leadership.
- Built Excel-based reporting templates and data models that standardized how financial information was consolidated across units, reducing manual work on recurring deliverables.

Assurance Senior Associate | Ernst & Young (EY) Mongolia

2022 – 2025

- Handled data collection, analysis, and performance reporting across 10+ client engagements — including Development Bank of Mongolia and Mongolian Mining Corporation, covering large-scale infrastructure, banking, and public sector organizations.
- Analyzed financial trends and operational patterns across client portfolios; turned findings into structured reports for leadership who needed clarity, not raw numbers.
- Built Excel dashboards and Power BI/Tableau reports tracking KPIs across 3+ concurrent engagements, moving clients away from manual updates toward consistent visual reporting.
- Ran QA checks on client datasets before delivery, catching inconsistencies that would have affected reporting accuracy and audit readiness.

Finance Intern | Mongolian Mortgage Corporation

2022

- Tracked loan portfolio metrics and supported management reporting on repayment trends.

PROJECTS

Forensic Financial Analytics | github.com/munkhtenger0/forensic-financial-analytics

- Built a tool that automates the kind of red flag analysis auditors perform manually, applying the Beneish M-Score model to live financial statements pulled directly from the SEC EDGAR API.
- Scored 21 major public companies for earnings manipulation risk, correctly flagging known high scrutiny cases while distinguishing legitimate hypergrowth from statistical red flags.

Arlington County Crash Analysis | github.com/munkhtenger0/arlington-crash-analysis

- Analyzed five years of Arlington County traffic crash data to identify high risk corridors, peak crash hours, and pedestrian and cyclist exposure, supporting the county's Vision Zero safety goals.
