MUNKHTENGER ENKHBOLD

Arlington, VA | 571-726-1282 | munkhtengery@gmail.com | github.com/munkhtenger0 | munkhtenger0.github.io

SUMMARY

Former Big 4 senior auditor at EY, hands-on with Excel and client financial records daily, who found the data side of the work more compelling than the audit itself. Built that into real data analyst experience at Mongolia's Ministry of Finance, tracking budget variances and standardizing financial reporting across government departments, then added a data analyst internship at MDThink in Maryland to sharpen SQL and cloud data skills. Currently completing an M.S. in Data Analytics, with self-directed projects in financial analytics and public safety data to keep building outside the classroom.

TECHNICAL SKILLS

- **SQL & Querying:** joins, CTEs, window functions, subqueries, query optimization
- **Visualization & BI:** Power BI, Tableau, Excel dashboards, KPI and executive reporting
- **Statistics & Python:** hypothesis testing, regression, A/B testing; Python (pandas, numpy, matplotlib)
- **Excel:** pivot tables, VLOOKUP/XLOOKUP, financial modeling
- **AI-Assisted Analytics:** Copilot and ChatGPT for exploratory analysis, SQL/Python drafting, and report generation
- **Data & Pipelines:** data cleaning, validation, QA, ETL, source-to-target mapping, REST API integration
- **Cloud & Tools:** AWS (Redshift, Athena, Glue), Git/GitHub, Jupyter, VS Code
- **Domain:** financial statements, audit methodology, budget variance analysis, HIPAA, healthcare data

EDUCATION

M.S. in Data Analytics, Business Analytics Concentration *Expected Sep 2026*
University of the Potomac, Washington, DC | Enrolled Jun 2025

B.S. in Financial Administration *Jun 2022*
University of Finance and Economics, Mongolia

EXPERIENCE

Data Analyst Intern | MDThink, State of Maryland *Jan 2026 - May 2026*

- Validated and reconciled large-scale Medicaid healthcare datasets using SQL (CTEs, window functions, joins) to support reporting extracts and reconciliation logic
- Mapped source-to-target data flows and ran profiling and quality checks in AWS (Redshift, Athena, Glue) to improve consistency across downstream reports
- Maintained HIPAA compliance and audit readiness while preparing analytics-ready datasets that fed executive KPI dashboards

Financial Data Analyst | Ministry of Finance of Mongolia *Jun 2025 - Jan 2026*

- Tracked budget variances across government departments, flagging discrepancies before they reached leadership and preventing errors from carrying into national reporting cycles
- Built Excel reporting templates and data models to standardize financial consolidation across units, streamlining a recurring monthly reporting process

Assurance Senior Associate | Ernst & Young (EY) *Sep 2022 - Jun 2025*

- Audited major institutional clients, including the Development Bank of Mongolia and Mongolian Mining Corporation, across banking, infrastructure, and insurance-sector engagements
- Built Power BI and Tableau dashboards to track KPIs across 3+ concurrent audit engagements, giving leadership clear visibility into engagement status and risk areas
- Performed QA reviews on client datasets prior to delivery, catching inconsistencies before they reached final audit reports

Finance Intern | Mongolian Mortgage Corporation *Jun 2022 - Sep 2022*

- Tracked loan portfolio metrics and helped prepare management reports on repayment trends

PROJECTS

Self-directed projects built outside of work to broaden hands-on skills in Python, SQL, and public data.

Forensic Financial Analytics — github.com/munkhtenger0/forensic-financial-analytics

- Built a Python pipeline pulling live SEC EDGAR financial data to apply the Beneish M-Score model across 21 major public companies, automating earnings-manipulation risk scoring

Arlington County Crash Analysis — github.com/munkhtenger0/arlington-crash-analysis

- Analyzed five years of Arlington County traffic crash data (SQL/Python) to identify high-risk corridors and peak crash hours, supporting Vision Zero safety planning
